ORCHESTRAL STRING RUNS

- RUNS BUILDER (Create your individual runs out of thousands of tempo-synced runs elements)
 - Runs Transitions Patch (playable smeared runs with repetitions!)
 - Hundreds of pre-recorded, tempo-synced runs
 - Tempo synced looped Ostinatos
 - Short Trills Patch (measured tempo-synced Trills HT/WT)
 - recorded in a medium-sized Scoring Stage
-
- 33,4 GB of samples
(19,7 GB NCW compressed)
 - 24Bit / 48KHz Patches

Orchestral String Runs became the industry standard for very fast, agile and quick string lines. Innovative tools like the Runs Builder let you build your own realistic runs out of thousands of tempo-synced run elements. In addition to a huge collection of pre-recorded octave runs, the Runs Transitions Patches let you perform your very own ideas. Orchestral String Runs also comes with basic articulations to enable a better blending with our other collections. The Runs Builder is consistently sampled to the Runs Builder included in Berlin Woodwinds.

Sections: Whole Ensemble, Violins, Violins & Violas, Celli & Basses

Supports the free Kontakt Player.

SINGLE Articulations

Capsule adjusts to your way of working, regardless whether you want a dedicated track for each articulation or if you wish to have as many articulations as possible on a single MIDI track. It's your choice with our single and multi patch design. Almost all features of our single patches are available, too, via the wrench button in our multi patches. Here are the features of Capsule; our new engine within Kontakt.

Intelligent Mixer with Auto-Gain (Volume Compensation), Audio Out Routing and Grouping Options

Deactivate specific Dynamic Layers

Define your own Round Robin rules

Add pre-defined dynamic filters for smoother dynamic blending

Purge specific Round Robins out of RAM

Controller Table: Add your own interpreter envelope curves to any MIDI CC

Switch between XFade dynamics or Velocity control

MULTI

Articulations

Apply True Legato to any long articulation!

Transform a trills or a tremolo articulation into a True Legato patch. Build your own combinations with up to 3 assignable legato speed slots per articulation, which will be triggered and will adapt to your playing speed. (e.g. at slow playing: Slurred Legato, on very fast performances fast runs).

Polyphonic Keyswitch Concept

Play up to 4 articulations simultaneously and choose in realtime between xfading, switching, 2D morphing via MIDI CC or velocity. You don't have to setup complicated sample maps and rules in advance. Just perform.

2D Morphing of articulations for sfx and sound design applications
