SOLOISTS I NOCTURNE VIOLIN

- **Extensive True Legato Set**
14 different legato performances (different speeds, expressions and techniques)
- Choose between **slurred** or **detaché** playing
- **Many different long notes** for a maximum of realism
- **Single Dynamic Layer Concept** to reduce phasing to a minimum
- Recorded at the **Teldex Solo Booth**

KONTAKT 5 Full Version required!

The **Nocturne Violin** is part of Orchestral Tools' new **Soloists Series**. A series of beautiful sounds from selected artists from Berlin which we **captured with a solo-style dynamic range** and a variety of lyrical expressions.

Months of development and test recordings led us to new concepts in legato and articulation sampling and with **CAPSULE** this instrument will be usable in a very intuitive way.

New techniques and an extraordinary sampling approach makes this Solo Violin playable at a degree of realism and variety of expression never heard before. Because we recorded this exceptional beauty in the **Teldex Solo Booth**, it will perfectly fit to the Berlin Series. The specific acoustic properties of this room lead to a more intimate and direct sound.

SINGLE Articulations

Capsule adjusts to your way of working, regardless whether you want a dedicated track for each articulation or if you wish to have as many articulations as possible on a single MIDI track. **It's your choice with our single and multi patch design.** Almost all features of our single patches are available, too, via the wrench button in our multi patches. Here are the features of **Capsule**, our new engine within **Kontakt**.

Intelligent Mixer with Auto-Gain (Volume Compensation), Audio Out Routing and Grouping Options

Deactivate specific Dynamic Layers

Define your own Round Robin rules

Add pre-defined dynamic filters for smoother dynamic blending

Purge specific Round Robins out of RAM

Controller Table: Add your own interpreter envelope curves to any MIDI CC

Switch between XFade dynamics or Velocity control

MULTI

Articulations

Apply True Legato to any long articulation!

Transform a trills or a tremolo articulation into a True Legato patch. Build your own combinations with up to 3 assignable legato speed slots per articulation, which will be triggered and will adapt to your playing speed. (e.g. at slow playing: Slurred Legato, on very fast performances fast runs).

Polyphonic Keyswitch Concept

Play up to 4 articulations simultaneously and choose in realtime between xfading, switching, 2D morphing via MIDI CC or velocity. You don't have to setup complicated sample maps and rules in advance. Just perform.

2D Morphing of articulations for sfx and sound design applications

THE MOST FLUID
LEGATO

Over years of development **Orchestral Tools** finally built the most fluid legato concept in the industry which adjusts to any tempo and rhythmic situation. Our **Adaptive Legato Engine** detects your playing speed in real time and perfectly adjusts all variables within the engine to your performance. Agile lines as well as slow soaring melodies are now possible within a single patch. And with **different True Legato speeds** as captured in Berlin Strings the **Adaptive Legato Engine** reveals its true potential.
